1. Use Case 1 - *Streak Tracking & Data Persistence*

Test Case ID	TC01 - Streak Validation
Test Objective	Ensure that streak increases only after all goals/daily habits are completed
Preconditions	0/5 habits are completed & User streak is 4 days
Test steps	1. Check off 4/5 habit checkboxes sequentially 2. Verify that streak counter is still 4 3. Check the last (5th) habit checkbox 4. Verify that streak counter has incremented by 1
Input Values	5 habits checked sequentially
Expected results	• Streak counter stays at 4 after 4/5 boxes are marked • After 5/5 boxes are marked, streak counter increments by 1 (to 5) • Celebration message appears with "Congratulations! You completed all your habits today!" • New streak is saved to localStorage • Celebration message displays current streak count

Test Case ID	TC02 - Garden Data & Progress Persists After Refresh
Test Objective	Check that the garden, habits, and streak progress persist after page reload & reopening the app
Preconditions	User has 3/5 habits completed for the day Garden has 3 plants Current streak is 1 day
Test steps	1. Refresh website (F5 or Ctrl+R) 2. Wait and verify that data is the same 3. Close and reopen site in new tab/window 4. Wait and verify that data is the same
Input Values	None
Expected results	• Garden displays 3 plants after refresh • Same 3 checkboxes are marked as completed • Completion indicator shows "Habits completed: 3/5" • Streak is still present at 1 day • localStorage data is restored accurately

	• All data persists across multiple refresh cycles
--	--

Test Case ID	TC03 - localStorage Inspection
Test Objective	find that local storage is correctly storing the data i.e. date, habits etc.
Preconditions	habits are checked
Test steps	1. Complete 2 habits 2. Open DevTools > Application > Local Storage 3. Inspect the data for correct data
Input Values	habits are checked off and local storage is checked
Expected results	habits array shows 2 items with completed: true garden plants equals 2 streak field is present date matches today's date Data structure matches AppState interface

Test Case ID	TC04 - Complete Session Persistence
Test Objective	find if app saves data after being fully closed
Preconditions	habits are already checked off 5/5
Test steps	1. Complete all 5 habits to achieve streak of 1 2. Verify celebration appears and streak = 1 3. Dismiss celebration message 4. Close the browser tab completely 5. Open a new tab and navigate back to the app 6. Wait for app to load
Input Values	habits are checked, app is closed and re-opened
Expected results	• All 5 checkboxes are still checked • Garden displays 5 plants • Completion indicator shows "Habits completed: 5/5" • Streak counter shows "Current Streak: 1 days" • Celebration does NOT re-appear (already dismissed)
