1. Use Case 1 - *Garden Decay*

Test Case ID	TC01 - First Time User
Test Objective	Check that a first time user starts with 0 plans, correct current date and no decay message is shown
Preconditions	User has not completed any tasks previously
Test steps	1. Clear localStorage (browser dev tools) 2. Open application 3. Verify "Checking decay..." appears briefly 4. Verify garden starts empty 5. Verify no decay message shown
Input Values	none
Expected results	App initializes with 0 plants, current date saved as last login

Test Case ID	TC02 - Same Day Login
Test Objective	completed habits and current plants stay after re opening the app, date stays the same.
Preconditions	Some habits are already checked off
Test steps	1. Open app and complete some habits 2. Close and reopen app on same calendar day 3. Verify habit states persist 4. Verify plant count unchanged 5. Verify no decay message
Input Values	none app is closed and re opened
Expected results	No decay applied, existing state maintained

Test Case ID	TC03 - One Day Missed
Test Objective	find if streak, plants and habits are removed after a day is missed
Preconditions	habits are checked date is changed to 2 days ahead.
Test steps	1. Open app, check 3 habits (3 plants)

	2. Use dev tools to change lastLogin date to yesterday 3. Refresh app 4. Verify "Checking decay..." appears 5. Verify decay notification shows 6. Verify plants reduced by 1 (should have 2 plants) 7. Verify all habits unchecked 8. Verify streak reset message
Input Values	habits are checked, date is changed
Expected results	Lost 1 plant, habits reset, decay message displayed

Test Case ID	TC04 - Dismiss Decay Message
Test Objective	find that the decay message for missing a day is removed when clicking dismiss
Preconditions	user missed a day and decay message shows up
Test steps	1. Trigger decay (any missed days scenario) 2. Click "Got it!" button on decay notification 3. Verify notification disappears 4. Verify app remains functional 5. Verify wilted garden indicator gone after dismissal
Input Values	Click dismiss
Expected results	Message closes, app continues normally
